

MERRY

“MERRY” Cable Stripper

PAT.P.

Available for stripping cables with large diameter.

Made of alumi-diecast, and light in weight.

It is troublesome, and a long experience is needed to strip the cables of large diameter with an electrician knife.

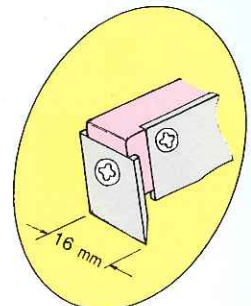

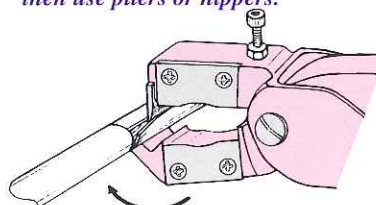

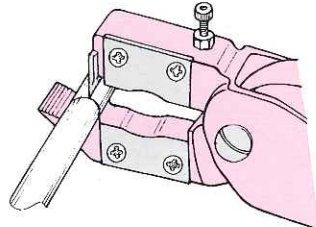

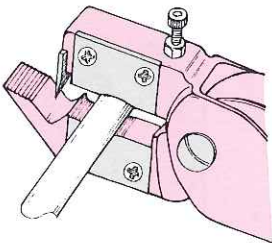

“Merry” Cable Strippers can solve the problems. safely, quickly and easily.

Cut the outer coating, by turning the cable for 3~4 round.

Strip it length-wise.

Then insert the blade into the stripped line, and remove the coating by turning the cable.

** If the coating is too hard to remove, then use pliers or nippers.*

〈Blade can be changed easily〉

Model No.	Length	Weight	Stripping capacity	Blade No. (Circle-wise)	Blade No. (Length-wise)
LW25	180 mm	210 g	Maximum 25 mm ϕ for outer dia Minimum 8 mm ϕ for inner cable	LW25-1	LW25-2

WARNING

- Never apply the tool for wire-stripping when the wire exciting.
- Pay utmost careful attention in handling the cutting blades of extreme sharp edges.
